These **DYNAMITE** babies just about hit the ground running! And by the way, we use **Solace** as our only naval treatment.

Stetson's PatriotiKid aka Dixie @ 3 wks  
04/25/04 filly by Kid Stetson X Dee  
Magum... Dixie's showing off her lovely blue  
eye to go with her red and whit coat color!

Skip Hollywood Bars aka Sonny @ 3 wks  
05/06/04 colt by Hollywood Dun It Good X  
Skip Holly Bars aka Maija, whose recovery  
from impalement is another testimonial

Shadows Dun It Good aka Rainy @ 9 days  
05/17/04 filly by Hollywood Dun It Good X  
Shadowhawks Mariah, the excellent  
producing line-bred Skipper W mare we  
bought from Rowan & John.

Well, we just had the last of our 2004 foal crop of AQHA and APHA babies, and are they **DYNAMITE**! They are so special with their energy and maturity that we have been able to increase our prices by about \$1500 across the board for them.

One woman, another breeder and owner of a \$60,000 mare, is buying one of our 2 year old stallions and is in awe of the maturity, size and obvious bone strength of all of our youngsters. She cannot get over the fact that our foals are weeks younger than hers and yet weeks older in appearance with already beautiful coats. She asked what we were doing and was sent home with the **DYNAMITE** Catalog and Rowan Emrys' article on feeding broodmares and babies [HORSE FAQ: FEEDING FOALS]!

Although we have found following the **DYNAMITE** Program to be a little more expensive since good grass hay, the concentrates (the 4 **Free Choice Minerals, TNT, Regular, HES**) and **PGR** cost more than alfalfa and the old grain mix we fed, we actually cover those costs with far fewer vet visits, no vaccine costs, little chemical deworming costs, and only trimming instead of shoeing. Our broodmares, riding horses, and youngstock also eat smaller quantities overall yet are looking better than ever.

We discovered **DYNAMITE** in 2001 when a mare had colic so bad we took her to CSU for surgery. Needing to pen her off from other mares when we brought her home, we went to Tarry-all Farms to buy some of their horse-safe pipe livestock panels and told our story to John who sent us in to talk to Rowan. After explaining the consequences of our alfalfa and sweet feed diet and the severe, expensive and continuous deworming program our vet had prescribed for us, she sent us home with the **DYNAMITE** Catalog, her **HOLISTIC HANDBOOK BASICS**, and enough products to get started with one horse. We could afford no more at the time since we had used all our savings (our hay money), \$7,000, to try to save the colicky mare who ended up dying anyway.

After seeing such incredible improvement on the marginal horse we started with, we soon became total fans of **DYNAMITE** putting all of our horses on the full program, becoming Distributors in the fall of 2003 and advancing to Director in April of 2004. The very few colics we have had since 2001 have been dealt with following Rowan's suggestions in her article HORSE FAQ: WHAT ABOUT COLIC? The 20cc's **Tranquil/DynaPro** combination syringed in their mouths every 15-20 min., along with **Tea Tree Oil** on their umbilicus and **Release** on various acupuncture points, has done the trick. We also use all the other products like **Trace Mineral Concentrate, Solace, Shampoo, MSM, Miracle Clay**, quarterly rounds of **Herbal Tonic, SOD, SuperStress** when necessary, **Wound Balm and Salve**, and oh, just everything! We can now successfully "doctor" our own horses with great results—see "MAIJA'S IMPALEMENT" for just one example of many.

We have discovered that following the full **DYNAMITE** program is really a great investment!
