The long wait is over! Jim has finally perfected his superior regenerative skin care cream to his satisfaction and is making it available to all as **Rejuvenating Skin Cream!**

RSC functions by relaxing the muscles as opposed to paralyzing them with chemical injections (think Botox derived from the Botulinum toxin Type A). It stimulates the skin fibroblast to rebuild the dermal matrix and resculpts the facial skin while stimulating the contraction of collagen fibers for a natural face-lift effect by minimizing fine lines and wrinkles.

98% Main Ingredient

White Tea Extract (Polyphenols)—Scientists at the University of Cleveland and Case Western Reserve University have shown that ingredients in white tea extract boost the immune function of skin cells, helping protect the skin from the damaging effects of the sun that cause aging and cancer. Researchers applied white tea Extract cream to a patch of skin on the subject's buttocks (an area not ordinarily exposed to much sunlight) and left another area unprotected. Both skin areas were exposed to artificial sunlight. Three days later the researchers did cellular-level comparisons of the coated and uncoated areas of the skin. The researchers examined Langerhans cells located in the outer layer of the skin. These cells are immune system sentinel cells that detect germs and mutated proteins caused by cancerous cells. Langerhans are sensitive to damage by sunlight and the researchers found the extract protected them. They also found the cream limited sunlight-caused DNA damage in skin cells.

Other Ingredients:

Acetyl Hexapeptide-3—a non-toxic, anti-aging peptide, chemically combined from naturally derived amino acids; it reduces catecholamine release which is responsible for muscle contraction.

Through the years, skin becomes tired from repeated muscle contractions giving way to wrinkles; by reducing this, over time a significant reduction in the depth and size of wrinkles are noticed.

Palmitoyl Pentapeptide-3—a messenger peptide that stimulates the production of skin fibroblast to re-

build the dermal matrix molecules and significantly reduce the appearance of wrinkles.

Vitamin C Ester—unlike L-ascorbic acid, it is joined with a fatty acid, *Vit E (dl-a-tocopheryl 2L ascorbyl phosphate, a tocotrienol 40x stronger than most Vit E)*, creating an ester bond to stimulate collagen production helping to minimize wrinkles while giving anti-inflammatory benefits; it is stable, non-acidic, non-irritating to the skin and offers maximum protection from free radicals at the precise spot they do the most damage - the outside of the cell.

Olive Leaf Extract (2)—*Arjunoic and Oleanolic Acids* are standardized to 80%, with the former supplying an antioxidant with anti-inflammatory and anti-microbial properties and the latter supporting skin texture and integrity.

Red Algae Extract—a mild, non-irritating, acid-free *exfoliant* that has a nutritive action with the oxygen supply to the skin while stimulating micro-circulation.

Dipalmitoylhydroxypropline—a botanical extract that provides triple skin-firming action by stimulating the contraction of collagen fibers, and protecting both *elastin* and *fibroblasts* against free radicals resulting in a re-sculpting effect while correcting imperfections.

Retinol (Vitamin A)—this form reduces wrinkles, pigment spots and reverses damage from UV rays without the skin-thinning side effects of other creams.

REJUVENATING SKIN CREAM CAN BE USED DAY AND/OR NIGHT with many users claiming they no longer need make-up. One gal using it for the first time exclaimed "Oh, so light! ... it melts right in!"

Jim Zamzow experimented using **RSC** on one side of his face and a popular "anti-aging" cream on the other for months. When we saw him at the October 2004 Rendezvous, the difference in the two sides of his face was remarkable with **RSC** emerging the clear winner. So kiss your botox good-bye, and toss out your Oil of Olay and Estée Lauder concoctions. This 60+ woman can attest to how quickly it penetrates leaving my skin smooth as a baby's bottom! See RESULTS: REJUVENATING SKIN CREAM IS FACT! ■
