

Make the choice for FREE CHOICE!

Which Free Choice Minerals Does My Horse Need?

Let your horse decide! A horse's natural instinct dictates what they need and with Dynamite's® Free Choice Minerals, your horse can self-regulate to balance calcium, phosphorus and trace elements. By providing the Dynamite Free Choice Minerals in separate, open feeders, your horse can pick and choose the type and amount of nutrients it needs to be balanced. Consumption of the minerals will vary and may change due to any number of reasons including, but not limited to, extremes in weather, stress or injury, strenuous activity or parasites. Your horse may ignore the feeders, eat just a little of one or more minerals or empty the feeder daily.

Let your horse choose - they'll thank you for it!
