DYNAMITE® DOES Make a Difference

“Is it dinner yet?” a Lab puppy at Justamere Ranch seems to be asking. All my puppies go home with Dynamite products to start them off right. My dogs are regularly complemented on their shiny coats and good condition much of which I attribute to **Dynamite Super Premium Diet for Dogs** and **Showdown®**.

Had a scare recently with my 8 month old Lab puppy, Meg. Somehow she got one of those bungee cords with the hooks on each end into her crate. I didn't notice it until about 4am when she started screaming bloody murder. Talk about a rude awakening! She must have been chewing on it and turned quickly because one of the hooks was embedded in the back of her mouth - she looked like a fish on a line! Got the hook out, squirted some **Solace™** and **Trace Minerals** (several applications) on it and finally got the bleeding stopped. She drooled something terrible for a day and the next day the side of her face and her neck swelled up, but she seemed fine otherwise and by the next day was back to her old self. Yeah Dynamite!

This is my Dynamite dog – Zipper. I adopted him from a Colorado shelter 3 years ago, at age 2-3 (they weren't sure) – so he's around 6 years old in these current photos. The shelter was so full of dogs, they had 2 in every cage and were getting ready to euthanize many.

When I adopted Zipper, he was dirty, with a dull and caked coat of old dog hair and mud, and underweight. It didn't take long having him on **Dynamite®** and **DynaPro™**, to get him looking and feeling great!

I can't tell you how many people have remarked on Zipper's coat looking so healthy and good!
